

You have an array of 5 stock symbols

"MS", "GOOG", "INTC", "AAPL", "GM", "FB", "INFY", "HP"

You will send AJAX requests to the following url by passing each and every symbol.

[http://query.yahooapis.com/v1/public/yql?q=select%20*%20from%20yahoo.finance.quotes%20where%20symbol%20in%20\(%22"+SYMBOL+"%22\)%0A%09%09&env=http%3A%2F%2Fdatatables.org%2Falltables.env&format=json](http://query.yahooapis.com/v1/public/yql?q=select%20*%20from%20yahoo.finance.quotes%20where%20symbol%20in%20(%22)

Once you get the output look for

response.query.results.quote.LastTradePriceOnly

response.query.results.quote.Change

If the Change is positive display the value in GREEN color and if the Change is negative display the value in RED color.

Have a refresh button to fetch the new values.

Stock	Price
GOOG	423.56
AAPL	56.12
